Porcelain Range 2026

FULL BODY VEIN TECH

Full-body veining gives natural stone-inspired porcelain greater depth and detail. During production, colour and veining are formed throughout the slab body. The digitally printed surface is developed to complement the internal veining, creating a more natural transition from the surface to exposed edges. This brings greater continuity to edge profiles, corners and cut-outs, including undermount sinks.

INTRODUCING YDL PORCELAIN

The YDL Porcelain collection brings together considered design, durable performance and versatility. The collection is offered across distinct 12mm and 20mm ranges, each with its own curated selection of colours, patterns and finishes. Together, the two ranges offer greater choice across different design styles, project applications and fabrication requirements. Suitable for both indoor and outdoor spaces, YDL Porcelain can be used for kitchen benchtops, splashbacks, bathroom vanities, feature walls, furniture and outdoor kitchens. With its strength, low-maintenance surface and broad design potential, YDL Porcelain offers a practical and refined material solution for contemporary spaces.

Rosa Verde | **20mm**

Taj Avorio | 20mm

Roman Travertine | 20mm

Bianco Glacier | 20mm

Bianco Glacier is calm and refined, with soft grey veining flowing across a fresh white base. The gentle patterning gives the surface a clean, airy quality with quiet sophistication.

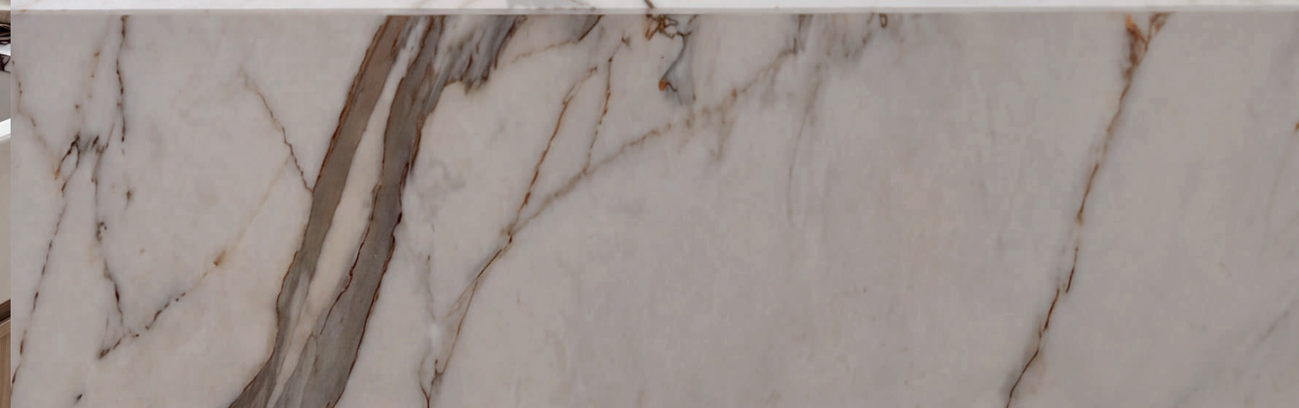

Calacatta Viola Luxe | 20mm

Calacatta Viola Luxe is bold and dramatic, with rich burgundy-brown veining set against a creamy white base. Its striking contrast creates a rich, expressive surface with a strong sense of luxury.

Matera Ceppo | 20mm

Calacatta Alto | 20mm

Calacatta Alto pairs a bright white base with confident grey veining for a crisp, elevated stone look. It brings a bold yet refined presence to modern interiors.

Rustico | 12mm

A light, cement-inspired surface with fine grey grains and a raw, ultra-textured finish. It captures the clean industrial character of fresh concrete in a refined, contemporary way.

Care & Maintenance

YDL Porcelain is designed for high performance and easy everyday care. Its non-porous surface stays smooth and glossy without sealing, waxing or polishing. For routine cleaning, simply wipe with warm soapy water or a mild pH-neutral detergent and a damp cloth, then rinse well with clean water. Avoid bleach, gumption, DIY polishing and prolonged rubbing in one spot.
